“Caring for Transgender Patients”

Healthcare providers often lack training, experience, and cultural competence when caring for the transgender population. Therefore, they may receive substandard care due to lack of knowledge, cultural competence and information related to their unique health care needs. This course is designed to close that knowledge gap in providers from all disciplines.

- Thursday, Aug 8
- 0900 am
- 1st level classroom / near cafeteria at Duke Regional Hospital
- Ed Track: LA_JA190308 (1.0 CE)

Presented by Dr. Margaret R. Muir, RN, CNML
